EDUCATION

University of Michigan School of Information
Masters of Science in Information (MSI), Human-Computer Interaction *Aug. 2025- May 2027*

- Programming in Python, Problem Solving, UX Foundations, UX Research Methods, Backend Development, Development of Mobile Experiences
- School of Information Master's Association, Aug. 2025-2026

University of California, Davis, Phi Beta Kappa
Bachelors of Science in Cognitive Science, Minor in Japanese, Minor in Neuroscience *Aug. 2019-June 2023*

- Introduction to Data Structures, Advanced Data Structures, Logic Probability and AI, Statistic Analysis of Psych. Data

WORK EXPERIENCE

Teaching Assistant, August 2026 - Present *Designing Complex Websites, Ann Arbor, MI*

- Led discussion sections and hands-on labs for 40+ students across 2 sections of Designing Complex Websites, teaching responsive design, accessibility, and front-end development concepts, which strengthened students' ability to independently plan, build, and troubleshoot multi-page websites.

UX Design Intern, June 2026 - August 2026 *Trevor Project, Remote, USA*

- Led the end-to-end design process for a series of interactive prototypes in Figma, using AI-assisted workflows to accelerate iteration, and validated designs through heuristic evaluations and usability testing that achieved a 95% task-learnability rate among participants
- Prioritized and shipped 8 new product features based on interview and usability-testing data; 86% of users reported the features improved their workflow
- Built cross-functional stakeholder relationships through 10+ recurring check-ins using Google Workspace, keeping design decisions aligned with product priorities

Event Ambassador, September 2025 - May 2026 *Student Affairs, Ann Arbor, MI*

- Serve as a peer representative for the UMSI graduate program, advising prospective students at 3 recruitment events and translating program offerings into guidance that strengthened applicant interest

Assistant Language Teacher, August 2023 - August 2025 *Ogimi Middle School | Ogimi, Okinawa, Japan*

- Introduced and managed rollout of World Classroom, an AI-driven language-learning platform, across three grade levels, improving student motivation and pronunciation confidence
- Redesigned conversational curriculum for students of varying proficiency levels using visual aids, grammar scaffolding, and interactive activities, increasing class participation
- Coordinated four large events for the entire school regarding cultural exchange, holiday events, and the hosting of guests using tools such as e-mail, spreadsheets, and Canva with the result of successful understanding of information for twelve guests, participants, and hosts

Concierge/Front Desk, June 2021- September 2021 *Aggie Inn, Davis, California*

- Organized the assignment of rooms using Choice Hotels platform with the result of guests having necessary accommodations and amenities
- Conveyed appeal of hotel and nearby properties to potential and existing clients to facilitate understanding of the area and possibilities with the result of increasing the charm of the boutique hotel

PROJECT EXPERIENCE

University of Michigan School of Information
Needs Assessment and Usability Evaluation, The Trevor Project, January 2026 - May 2025

- Completed a usability evaluation of software using methods like comparative analysis, user interviews, interaction maps, and qualitative data with the results of presenting three to five key findings for each of the six methods that were actionable and increasing understanding of the product for the stakeholders

SKILLS

Software: Python, C++, HTML, API**,** Microsoft Word, Spreadsheets, Powerpoint, HTML, CSS, JavaScript, Figma, Jira, React, Typescript, NoSQL Databases, Agile Development Workflows

User Research: Interviews, Surveys, Literature Review, Affinity Boards, SWOT Analysis, Figjam, Heuristic Analysis, Competitive Analysis, Usability Testing
